

FIRE: INTERMITTED RINGING ALARM

H2S: HIGH PITCH SIREN (15 PPM)

ABANDON SHIP: CONTINUOUS RINGING ALARM

EMERGENCY DISMISSAL: THREE SHORT RINGS

Features:

1. Can accept 4- digital inputs from the field
2. Whenever an input gets activated, system will close the contact of Paging Selection O/P which will enable the paging selection of existing system.
3. System outputs the audio signal corresponding to the input activated.
4. System will continue to o/p the signal as long as the input causing the alarm is cleared.
5. Mute switch is provided in the system, which will help the operator to do the paging while the emergency signal is activated.
